

Stimuli™ Version 3

"Vision Testing for the 21st Century"™

Stimuli Slimline™ with the latest Generation 3 Software

Stimuli™ Features:

- Ease of use
- Wireless Remote Control
- Automatic Startup and Shutdown
- Custom optotype sets and charts
- Direct Access
- Programmability

Stimuli™ has it all...

Available Optotypes: Sloan, Snellen, Numerals, HOTV, Tumbling "E"s and "C"s, many Pediatric, and international Optotypes.

The Stimuli™ System has simple help screens for each test to speed you through the learning process. This screen shows the controls for the full suite of Red/Green tests.

The convenient tactile Remote Control glows in the dark and provides the freedom of a **wireless** design. No need to look at the control buttons to modify most tests as the elegant design is simple and quick to learn.

In addition to quickly accessing all sizes, and the ability to directly-access sizes from 20/20 through 20/200, we offer direct access to all tests and programmability. A quick interface allows you to set your preferred chart, which further speeds the examination process.

The only Patented Computerized Visual Acuity System based on International Standards that supports Vision Testing, Contrast Sensitivity, and customizable Patient Education in an All-In-One design.

We are proud to offer the advanced Stimuli Slimline™ with our latest Generation 3 software. The Stimuli Slimline is a completely self contained, flat-panel visual acuity system that can hang on the wall or sit on a small shelf or cabinet at the end of your refracting lane. Stimuli Slimline with our latest Generation 3 software remains in a class by itself.

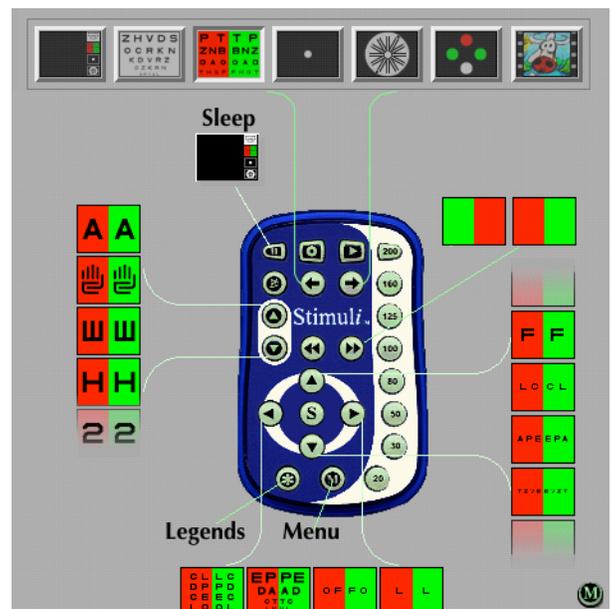

Stimuli™ continues the already popular product line with key features and capabilities including: programmability, direct test access, many optotypes and the latest Slimline™ form factor.

The LED backlit 21.5" flat panel screen is the most precise vision testing display and is available in all models including Basis, Clinic, and Pediatric.

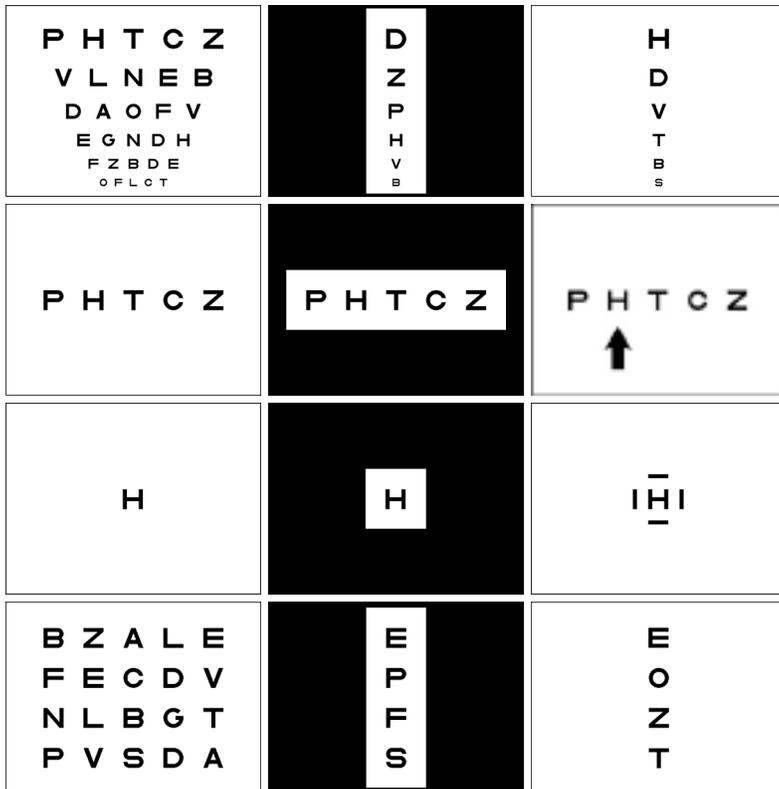

Choose the one that is right for you. Or, start with our Basis product and update when ready with just the swap of a key to our fully-featured Clinic or Pediatric models.

Installation is a breeze and the visual impact is beyond compare. Sleek styling with a simply elegant design complements the quality and precision of the Stimuli™ software to come together in a product that is unrivaled.

The patented Stimuli™ System is still the fastest to learn and easiest to use. Adjustable for a wide range of room sizes either direct or mirrored. Options include desktop display, dual monitor, foot pedals, and custom video sets.

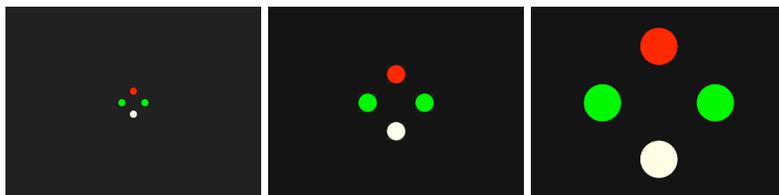

Stimuli™ – Features

Progressive, Single Line, Single Optotype, and Equal Size charts. With random refresh, Columns, Isolation, Pointer and Contour Bars. Refresh of a single crowded optotype, eliminates patient confusion.

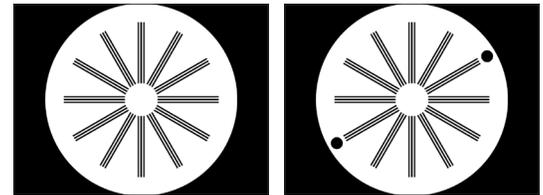

Optional Contrast Test in all sizes and optotypes with infinite refresh from 50% to 0.6%.

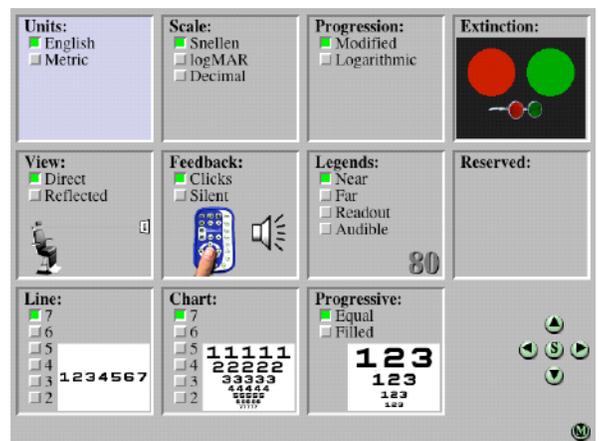

Exclusive sizable Four Dot Test with enhanced extinction calibrated to the refraction distance, including internal and external angle measurements with legends or spoken sizes.

On-screen legends for each test are displayed at the touch of a button

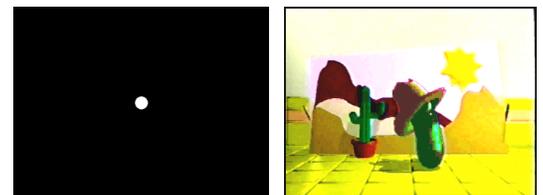

Astigmatic Dial with Exclusive Indicator.

English or Metric units selectable for refraction calculator. Snellen, logMAR or Decimal units selectable for optotype legends. American Modified Snellen or true, logarithmic chart progression.

Direct or Mirrored installations are easily setup and can include an optional dual screen.

Multiple Legend formats are provided by Stimuli™ including On-screen large or small figures, and even an Audible legend feature.

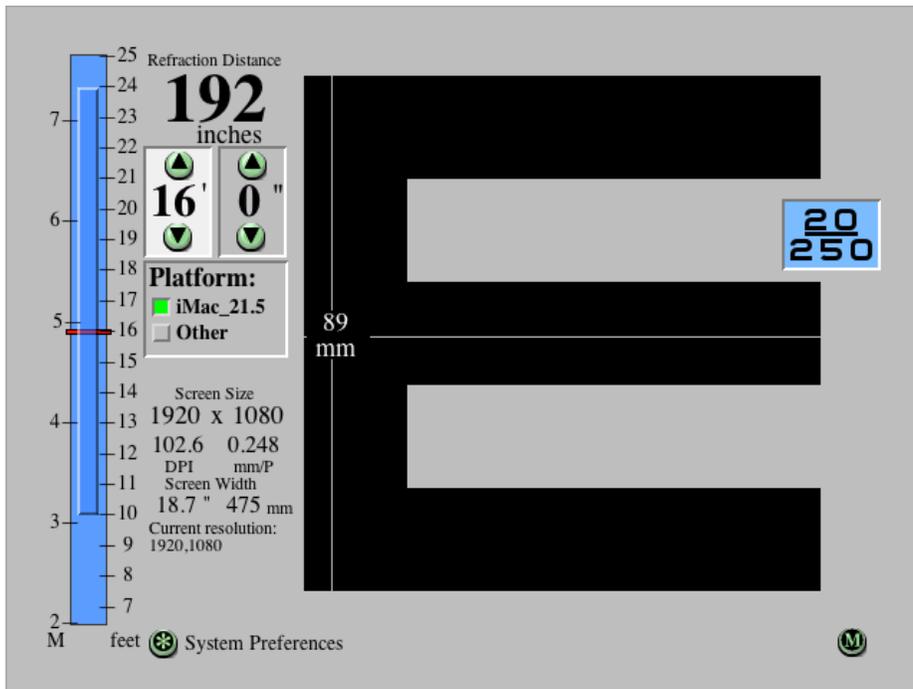

Fixation Dot with options including: Reversed, Animated, and the Disappearing Dot Game. Also, optional Cartoons and our unique Animal Parade:

Stimuli™ Animal Parade

Stimuli™ – Flexibility

Many optional features allow each system to be customized as desired.

Simple Setups allows easy adjustment of system features and options. More accurate calibration calculator and large on-screen calibration optotype assures accurate setup.

Custom optotype test sets allow you the widest range of custom charts.

Customizable Education Videos allow your staff to provide concise, repeatable, and thorough training to each and every patient while freeing them for more productive tasks.

Refraction distances for the 21.5" Slimline™ version are continuous from 10 to 24 feet and can be further extended.

Additional user-adjustable features like setting the number of lines on a chart and the number of characters on a line, allow the practitioner to tailor the charts for pediatric and geriatric patients. Together, these new features can simplify usage while reducing testing time, leaving you more time to spend with your patients.

Optional foot pedals allow hands-free control of each testing suite's major functions.

An optional convenient Desktop Readout can be placed anywhere in the examination lane.

Automatic Startup feature means Stimuli™ is ready when you are. Adjustable Shutdown allows you to extend your examination day.

Laptop Portable versions are also available.

Designed with your practice, patients, and staff in mind. The **Stimuli™ System** is the Clear Choice when it comes to Acuity Testing.
